Saint-Petersburg

2021

Description of the educational program

With the globalization of the economy, the expansion of international relations of transnational companies, the role of international logistics, which organizes and manages the movement of goods between different countries, increases.

The goal of the program is to train highly qualified specialists in the field of international logistics and supply chain management, as well as to provide competencies for organizational, managerial and analytical activities in the field of logistics and supply chain management in international markets in the context of globalization.

The educational process is based on fundamental mathematical, computer, informational, economic, linguistic and legal training.

The acquired competencies provide an opportunity for a wide choice of areas of further specialization within the framework of the magistracy.

Key features of the program

- The program is applied in nature and is aimed at training highly qualified managers and specialists in the field of international logistics and supply chain management at all levels.
- Active use of modern interactive forms of education.
- Implementation of the educational process with the involvement of representatives of international business and foreign teachers.
- Exchange Semester at foreign partner universities in academic mobility programs (participation on a competitive basis).
- Special emphasis in training is given to a practice-oriented approach to training with the use of specialized software.
