

**PASSPORT OF THE EDUCATIONAL PROGRAM**

38.04.01\_20 «Accounting, analysis and audit in the organization's  
management system»  
in the field of training  
38.04.01 «Economy»  
Qualification: master's degree

Approved "23" September 2019 12: 53

## **Description of the educational program**

The purpose of the program is to train masters, in the future - qualified managers of accounting, audit, financial and analytical services of commercial and non-profit organizations, government agencies, banks, investment, insurance and other companies. Graduates are prepared for research, project-economic, analytical, organizational and managerial activities in the field of accounting, economic analysis, audit, and taxation. They, in particular, acquire the skills of internal and external audit; implementation of financial and management accounting in the activities of an economic entity, adaptation of the organization's accounting system to the requirements of international standards, accounting and tax consulting.

Cooperation with the Accounting Methodological Center (Buhgalterskij metodologicheskij centr) allows students to participate in the professional standard-setting process - the development of new federal accounting standards.

The information technology competence of the masters is realized by including the software products of well-known partner companies in this field in the educational process.

## **Key features of the program**

The program is accredited by the international organization ACCA (Association of Chartered Certified Accountants). The ACCA qualification is an international recognition of the high competence of a specialist in the financial accounting profession, which makes it possible to build a career in companies around the world. From the 2019/2020 enrollment year, graduates of our Master's program are exempt from passing three theoretical module exams and one Practical module exam (F8 Audit and Related Services) of the full ACCA qualification.
